

# Re-Genesis

*'To everything there is a season  
and a time for everything under heaven.'*

*Ecclesiastes 3.1*

And God said: "Let there be Light"

...and so... electrons danced,

the sun blazed, the stars blinked.

Mountains moved and deep touched deep.

Elements met and married - and so was H<sub>2</sub>O begun

Black made coal - and gold played hide and seek.

Cells learned times division - and sums were fun.

DNA exploded greens, unfolded wings and fins...

and even hairy things were born.

For everything there was a time and season,

inhabited by all that walked or ran, or flew or swam:

a re-cycling of the elements,

a re-newal of resources,

a re-balancing of habitats... and

**God saw that it was good.**

In His image human-kind emerged...

explorers of the land and seas...

pioneers of tools and opportunities...

marking boundaries, crafting wars...

Earth gave – we took –

and gave our thanks.

Earth gave more -

we took more... & even more...

Earth still gave more –

we went to war...

to protect our 'rightful' property!

**Earth gasped –**

and still we took...mindless of fragility.

**Time now to look...**

beyond the blindness of industrial power,

beyond the barricades of our mighty minds...

to sift through seasons

and the sands of time and find

what we have lost...

to know our childhood place again...

Time to reach with open hands,

through the kiss, the nails, the empty tomb...

to reclaim harmony in humanity,

and make our peace again...

with earth....

And Peace with God.

*AEMarr*
